Instructions for Ordering Parts

First. Always give serial number of tractor, engine or power lift when ordering repairs.

Second. Give number and name of each part ordered. If in doubt as to correct name and number, send dimensioned sketch or return broken parts, charges prepaid.

Third. Orders for parts should be written separately from correspondence.

Fourth. State whether shipments are to be forwarded by Freight, Express, or Parcel Post. Telegraph orders will be shipped Express or Parcel Post unless otherwise instructed.

NUMERICAL TELEGRAPHIC CODE

The following code may be used to transmit numerals in telegrams.

Each numeral is designated by a letter as follows:

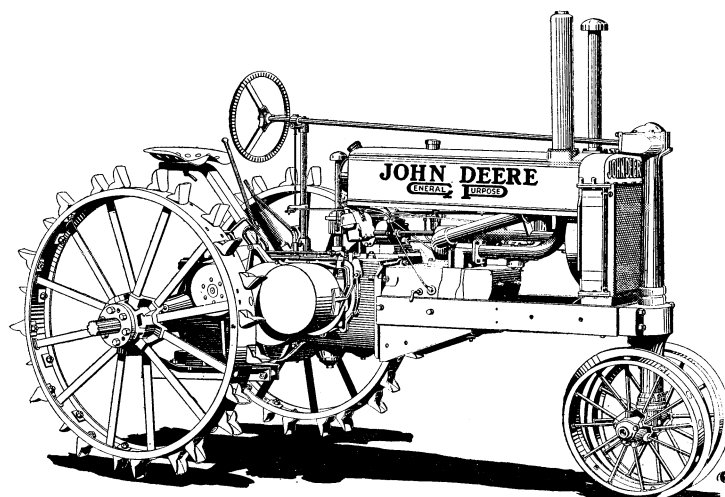

1	2	3	4	5	6	7	8	9	0
Q	U	I	C	K	T	R	A	D	E

Use the letter X to separate prefix or suffix letters from the code letters.

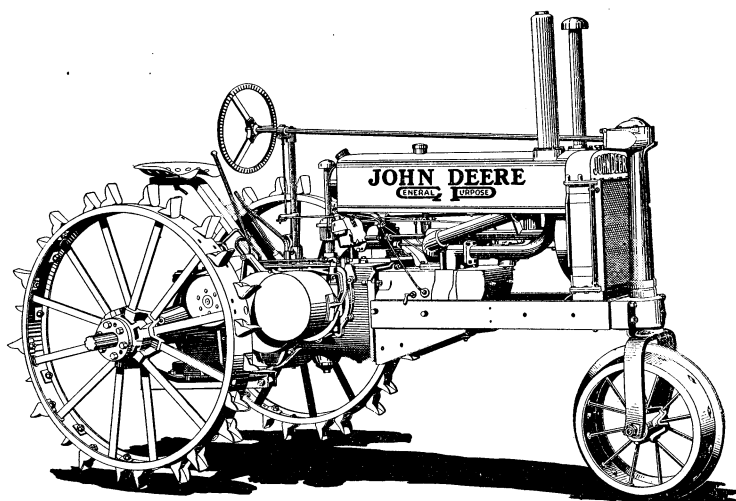

Example: Express 10 AD-315, 20 X-429

Telegram will read: Express ten ADXIQK twenty XXCUD

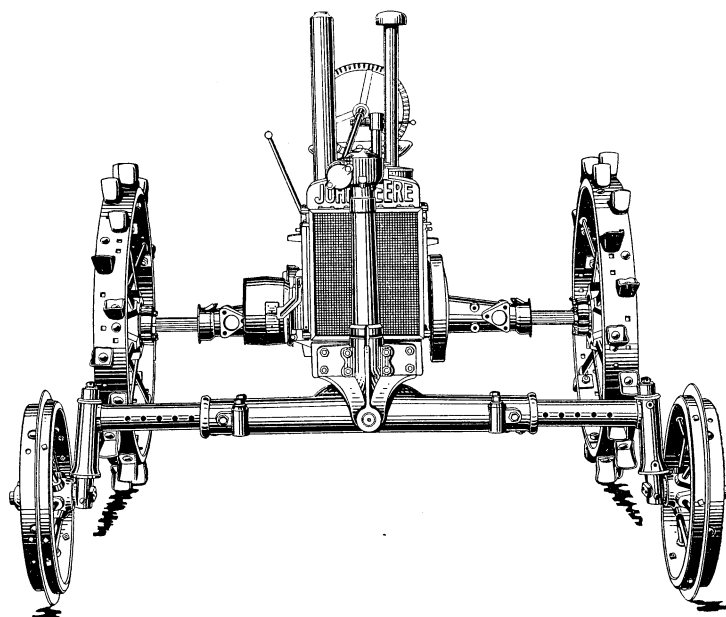

The telegraph companies count a group of five letters or less as one word, and six to ten letters as two words. When a straight message can be transmitted in ten words or less, do not use code. It should rarely be necessary to use code words in a day letter or night letter, although this is permissible.

CASTINGS SOLD ONLY AS ASSEMBLIES FOR MODEL E AND EK ENGINES

In order to assist in the interpretation of repair orders, when a customer orders from the numbers on casting and these numbers do not appear in this repair list, this list is made up showing the number of casting forming a part of an assembly and showing the correct assembly to use for the repair.

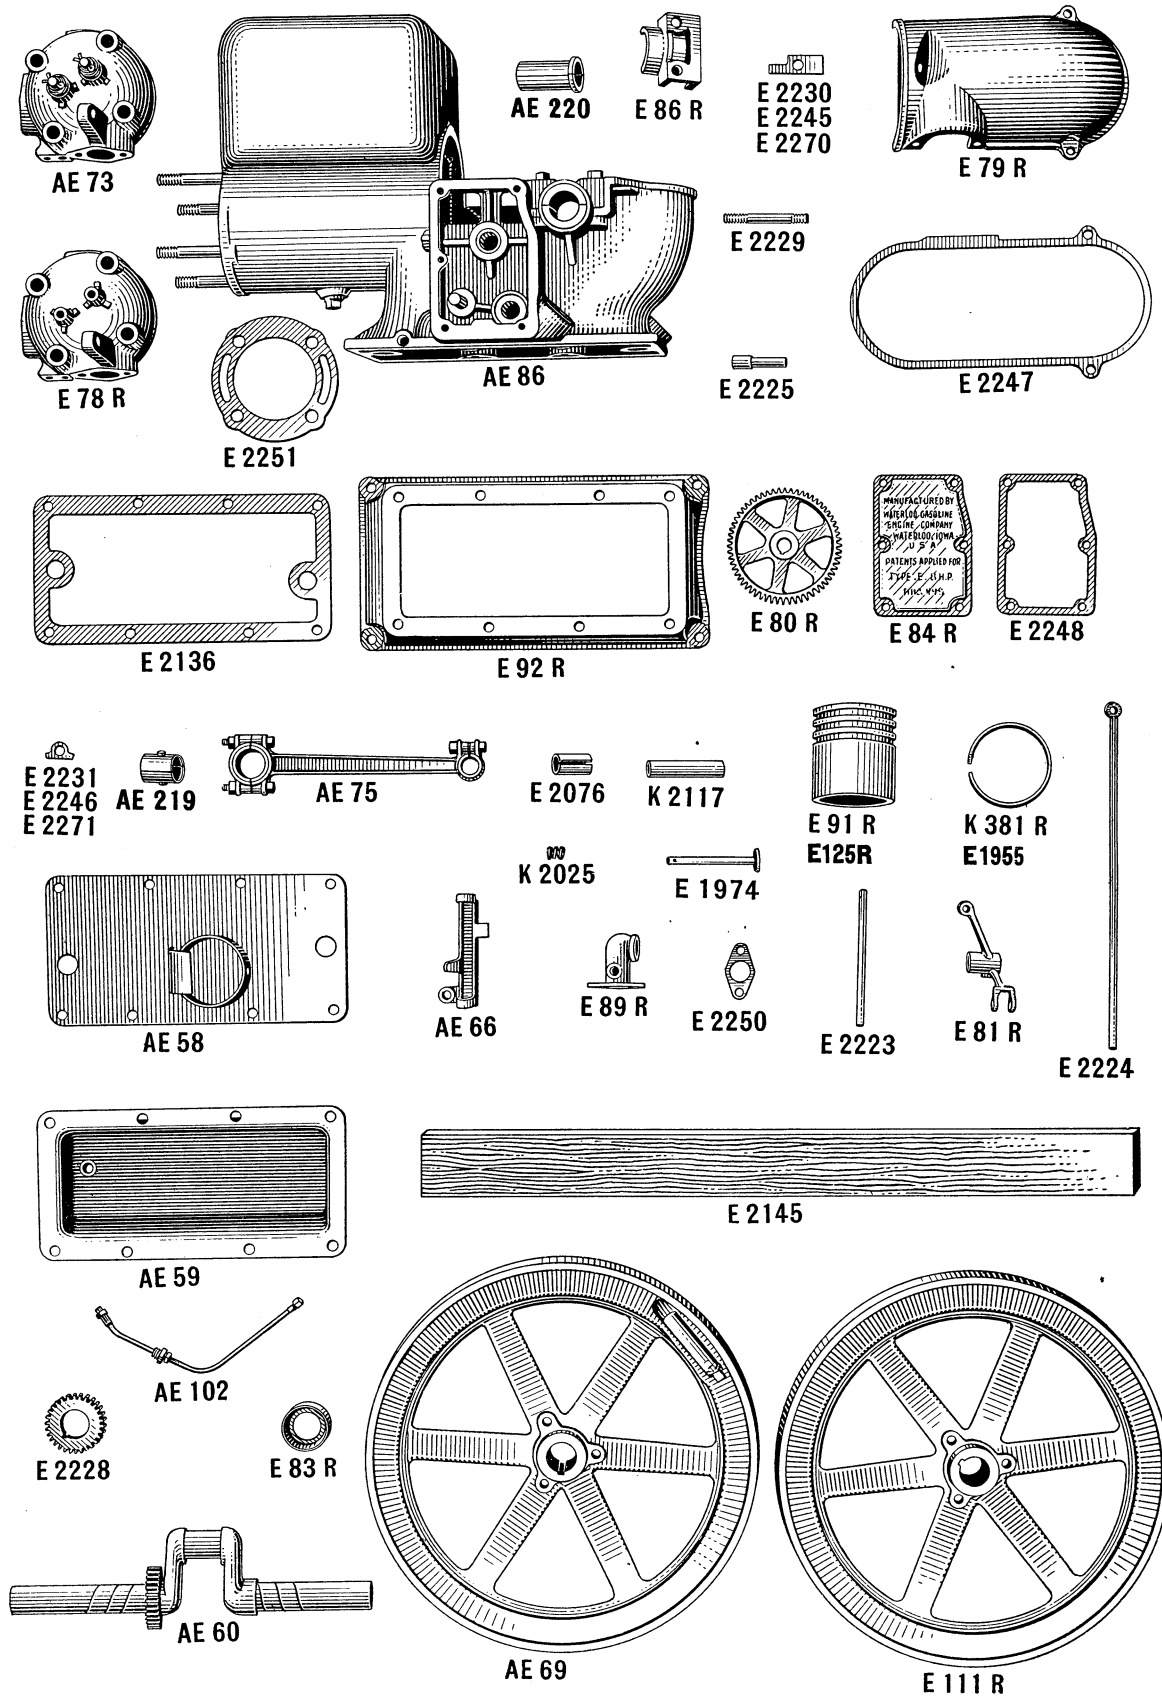

For example, the number cast on the 1-1/2-H. P. Crank Case Cover is E60R, but the cover is furnished as a repair including oil guard, which changes the E60R to AE29.

Instructions for Ordering Parts

First. Always give serial number of tractor, engine or power lift when ordering repairs.

Second. Give number and name of each part ordered. If in doubt as to correct name and number, send dimensioned sketch or return broken parts, charges prepaid.

Third. Orders for parts should be written separately from correspondence.

Fourth. State whether shipments are to be forwarded by Freight, Express, or Parcel Post. Telegraph orders will be shipped Express or Parcel Post unless otherwise instructed.

NUMERICAL TELEGRAPHIC CODE

The following code may be used to transmit numerals in telegrams.

Each numeral is designated by a letter as follows:

1	2	3	4	5	6	7	8	9	0
Q	U	I	C	K	T	R	A	D	E

Use the letter X to separate prefix or suffix letters from the code letters.

Example: Express 10 AD-315, 20 X-429

Telegram will read: Express ten ADXIQR twenty XXCUD

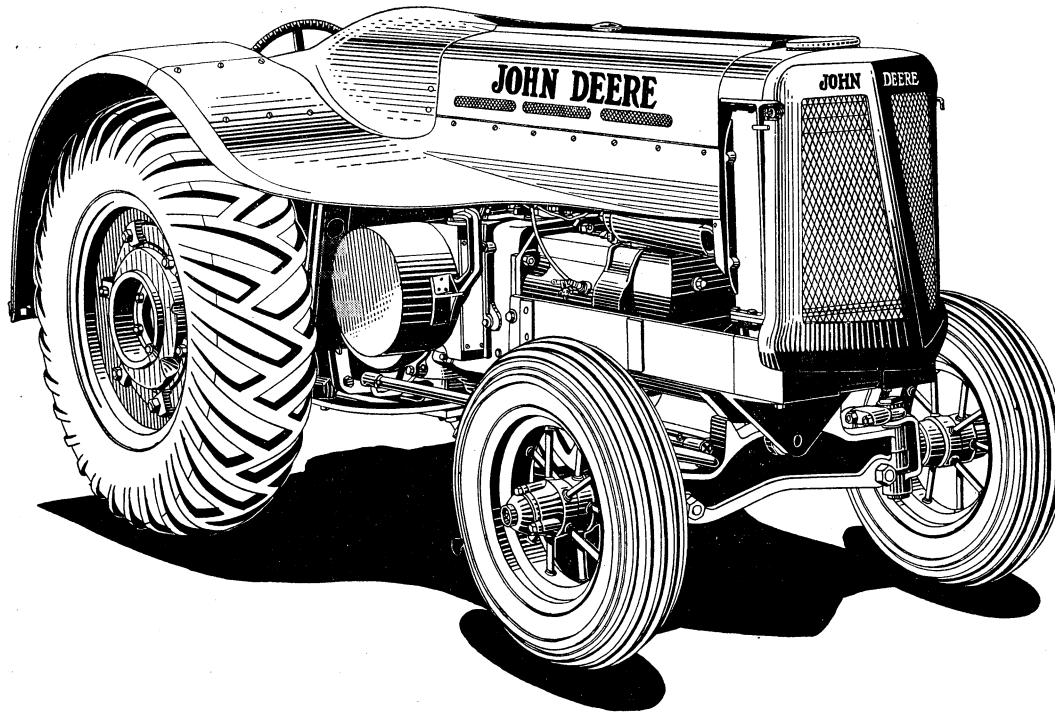

The telegraph companies count a group of five letters or less as one word, and six to ten letters as two words. When a straight message can be transmitted in ten words or less, do not use code. It should rarely be necessary to use code words in a day letter or night letter, although this is permissible.
