John Deere Model "LA" Tractor

ORDERING JOHN DEERE PARTS FROM THE BRANCH HOUSE

PART AND KEY NUMBERS

1. Order by part numbers **exactly** as shown in catalog including prefix and suffix letters. Be especially cautious when ordering such items as lock washers, rivets, bolts, and other hardware.
2. Key numbers should not be listed. They are used only as reference between illustrations and parts lists.
3. When ordering parts for carburetors, generators, magnetos, etc., in addition to including a short description of the part, include name of unit, as for example—"Wico Magneto," "Hercules Engine," etc.
4. When ordering items not on hand or regularly carried in stock, be sure to check machine and vintage (date or serial number) information.

USE OF PARTS CATALOG INDEX

1. Use index in front of each catalog to locate groups of parts such as axles, beams, cylinders, etc.
2. To locate information on individual part numbers, use numerical index in back of catalog (printed on yellow pages.)
3. Orders for parts should never be made up from information in numerical index—always refer to illustration and parts list pages.

WRITING UP ORDERS

1. To insure quick service, use Standard Parts Order Blanks furnished by branch house. (You may assign your own order number to be used as reference.)
2. Order parts separately from whole goods.
3. Correspondence should be separate from orders for parts.
4. List part numbers in alphabetical and numerical sequence by factory lines (which can be determined by the last suffix letter after each part number.)
5. Write or print information on orders plainly.

SHIPPING INFORMATION

1. Specify how goods are to be shipped—whether by Freight (specify routing), Truck (specify carrier), Express, Air Express, Parcel Post, or Air Parcel Post.
2. Telegraph orders should give shipping instructions. Shipment will be made by Express or Parcel Post unless otherwise specified.
3. Send order to branch house. Do not order directly from factory.

IF NO PART NUMBER OR DESCRIPTION IS AVAILABLE

If part number cannot be located, send a sketch or return the broken part (shipping charges prepaid) to the branch house. Give the branch house parts department all information available concerning the name of the machine, age or serial number, location and description of part or numbers of adjacent parts, so new part can be identified and shipped quickly.

HOW TO USE THE INDEXES

A printed index on page 5 is for those who are familiar with the nomenclature of the parts of the tractor.

AN EXPLANATION OF SERIAL NUMBER LISTING

Serial number information given on any page is applicable only to parts listed and illustrated on that page.

When the parenthesis include only the dash (—)
the part is used on all machines.

When a serial number appears before the dash (LA0000—)
the part was introduced with that serial number and is still being used.

When a serial number appears after the dash (—LA0000)
the part was used up to that serial number but was not used after that serial number.

When serial numbers appear both before and after the dash (LA0000—LA1000)
the part was used beginning with the first serial number, but was not used after the second serial number.

EVERY DAY

Check oil level in engine.
Remove dirt from Air Cleaner cup
and put in new oil (SAE-30)

ONCE A WEEK

Grease 14 Alemite Fittings.
(Use gun grease)

EVERY TWO WEEKS,

or at end of 60 hours operation
Drain and refill crankcase in
engine—Use SAE-30 oil in summer,
use SAE-10W oil in cold weather—
crankcase holds three quarts
Oil Fan Bearing— Same oil as in engine)
Check oil level in following:
Clutch Shaft Housing (—(SAE-90 Oil))
Transmission
Final Drives

TWICE A YEAR

Pack front wheel bearings with grease.
