### EXPLANATION OF SERIAL NUMBERS

Serial number information given on any page is applicable only to parts listed and illustrated on that page.

When the parentheses include only the dash..... (       -       )  
the part is used on all Model "50" Tractors.

When a serial number appears before the dash..... (0000000-       )  
the part was introduced beginning with that serial number and is still being used.

When a serial number appears after the dash..... (       -0000000)  
the part was used up to and including that serial number but was not used after that serial number.

When serial numbers appear both before and after the dash..... (0000000-0000000)  
the part was used beginning with the first serial number but was not used after the second serial number.

When a serial number begins with PCV or 3RC..... (PCV000-       )  
it refers to the power take-off shaft, Powr-Trol, or remote cylinder, and not to the tractor.

When a serial number contains xxxxxxx before the dash..... ( xxxxxxx-       )  
the part is approved for production but the beginning serial number was not established when this catalog went to press.

When a serial number contains xxxxxxx after the dash..... (       -xxxxxxx )  
the part is discontinued but the last serial number was not established when this catalog went to press.

### EXPLANATION OF SUBSTITUTION INFORMATION

Part substitution information given on any page is applicable only to parts listed and illustrated on that page.

### EXPLANATION OF PACKAGED PARTS

For added protection and ease of handling between the factory and branch houses and between the branch houses and most dealers, some parts which appear in this catalog, such as gaskets, are packed in packages which contain more than one of the part—usually five or ten. Dealers may order either the packages or the individual parts from the branch houses. However, when possible the package or multiples of the package should be specified.

These parts should not be confused with other packaged items which are packaged in certain quantities but cannot be ordered individually.

Both types of packaged parts are identified by a statement which appears in the Description Column.

When the statement reads:

**"Packed 5 in a pkg." or "Packed 10 in a pkg.," etc.,** dealers may order either the packages or the individual parts from the branch houses. The packages bear the same part number as the individual parts.

When the statement reads:

**"Package of 25" or "Package of 50," etc.,** the parts cannot be ordered individually. The number which appears in the Part Number Column is a "package" number and not the part number of the individual part.

# ORDERING JOHN DEERE PARTS FROM THE BRANCH HOUSE

## PART AND KEY NUMBERS

1. Order by part numbers **exactly** as shown in catalog including prefix and suffix letters. Be especially cautious when ordering such items as lock washers, rivets, bolts, and other hardware.
2. Key numbers should not be listed. They are used only as reference between illustrations and parts lists.
3. When ordering parts for carburetors, generators, magnetos, etc., in addition to including a short description of the part, include name of unit, as for example—"Wico Magneto," "Hercules Engine," etc.
4. When ordering items not on hand or regularly carried in stock, be sure to check machine and vintage (date or serial number) information.

## USE OF PARTS CATALOG INDEX

1. Use index in front of each catalog to locate groups of parts such as axles, beams, cylinders, etc.
2. To locate information on individual part numbers, use numerical index in back of catalog (printed on yellow pages.)
3. Orders for parts should never be made up from information in numerical index—always refer to illustration and parts list pages.

## WRITING UP ORDERS

1. To insure quick service, use Standard Parts Order Blanks furnished by branch house. (You may assign your own order number to be used as reference.)
2. Order parts separately from whole goods.
3. Correspondence should be separate from orders for parts.
4. List part numbers in alphabetical and numerical sequence by factory lines (which can be determined by the last suffix letter after each part number.)
5. Write or print information on orders plainly.

## SHIPPING INFORMATION

1. Specify how goods are to be shipped—whether by Freight (specify routing), Truck (specify carrier), Express, Air Express, Parcel Post, or Air Parcel Post.
2. Telegraph orders should give shipping instructions. Shipment will be made by Express or Parcel Post unless otherwise specified.
3. Send order to branch house. Do not order directly from factory.

## IF NO PART NUMBER OR DESCRIPTION IS AVAILABLE

If part number cannot be located, send a sketch or return the broken part (shipping charges prepaid) to the branch house. Give the branch house parts department all information available concerning the name of the machine, age or serial number, location and description of part or numbers of adjacent parts, so new part can be identified and shipped quickly.
