

HESSTON
SA**ATTENTION**

A partir du 1^{er} mai 1984, toutes les références HESSTON sans lettre qui ne se composent pas de 9 chiffres devront être préfixées par 70 ou 700 comme ci-dessous :

ANCIENS N°	NOUVEAUX N°
712612	700712612
7704703	707704703

Merci de rectifier tous les numéros HESSTON vous concernant.

From May 1.84 on, all HESSTON references without letter which are not composed of 9 numbers will have to be prefixed by 70 or 700 as follows :

OLD N°	NEW N°
712612	700712612
7704703	707704703

Thanks to rectify all HESSTON numbers concerning you.

**DIVISION COEX**

FORAGE HARVESTER

ILLUSTRATED PARTS LISTING

This is completely revised Illustrated Parts Listing.
It replaces Manual Number 1724921

Revised September 1984

PRINTED IN FRANCE

FORM 700050956
HFHSP 7580-83

REPLACEMENT HARDWARE

The high quality hardware (C 8.8 or grade 5) used on HESSTON equipment as well as bolts, washers, pins, etc., shown on first pages of this manual are considered as standards unless specified otherwise in the Illustrated Parts List. The use of any poor quality of hardware can result in the unanticipated failure of the hardware or related structures, and may cause personal injury, damage to the equipment, or loss of property.

HESSTON ASSURES YOU THE LATEST

You may note an occasional difference between the illustration and an actual part received on your machine or as a replacement. This means you are getting the benefit of a new design improvement made after the release of this manual.

SERIAL NUMBER EFFECTIVITY OF PARTS AND ASSEMBLIES

Due to design changes during the life of this machine, it is necessary to identify the effectivity of the original and the redesigned parts by the machine Serial Number. When an individual part is redesigned, the original part's number and the redesigned part's number will be set off with a bracket.

When a group of parts is redesigned, the earlier configuration will be shown within the main illustration on the page and the latest configuration will be shown as a detail within a border. The bordered detail (insert) will be designated with the applicable machine Serial Number effectivity. When a major redesign has taken place, the entire page will be limited and the Serial Number effectivity will be placed across the top of page.

SYMBOLS INDICATING SERIAL NUMBER EFFECTIVITY

- A black square in front of a part number indicates that the existing stock should be used prior to ordering the superceding part number listed below it.
- The bracket is used to enclose two or more part numbers for a common application.

NOTE: Supercedence and interchangeability cannot always be indicated in the illustration by (■) black square or (□) bracket — be sure to check Serial Number effectivity and substitution of single or related parts in the Parts Listing.

Examples in Parts Listing (with or without Serial Number):

- | | |
|-----------------------------------|--|
| □ 742098 | This usage indicates that both parts are interchangeable. |
| □ 748867 | |
| □ 6278098 (S/N 181-001 thru -200) | This usage indicates a design change in which the parts are not interchangeable. |
| □ 7326972 (S/N 181-201 and on.) | |
| ■ 730020 (S/N 181-001 thru -932) | This usage indicates that the second part interchanges with the first part but that the second part must be stocked for its respective effectivity. |
| □ 840101 (S/N 181-933 and on.) | |
| ■ 079323 (S/N 181-001 thru -600) | This usage indicates that the second part interchanges with the first part but that the second part and the third part must be stocked for their respective effectivities. |
| □ 079498 (S/N 181-601 thru -680) | |
| □ 080032 (S/N 181-681 and on.) | |

SERIAL NUMBER IDENTIFICATION

To determine the correct part for your machine, it will be necessary to check the serial numbers. A Serial Number Plate is located on the left front corner of mainframe. This Manual covers machines with Serial Number 143.001.001 and Later.

BOULONNERIE DE RECHANGE

La visserie de qualité (Classe 8.8 ou Grade 5) utilisée sur le matériel Hesston ainsi que les écrous, rondelles, goupilles, etc., représentés sur les pages de légende de boulonnerie au début de ce catalogue, sont considérés comme standards sauf si une spécification différente est indiquée. L'utilisation d'une qualité inférieure pourrait occasionner une casse imprévisible de la boulonnerie ou des structures sur lesquelles elle est utilisée et pourrait de ce fait représenter un danger pour les utilisateurs, endommager le matériel ou diminuer ses possibilités.

HESSTON ATTIRE VOTRE ATTENTION SUR CE QUI S'UIT

Il est possible que vous notiez une différence occasionnelle entre l'illustration et une pièce de votre machine ou une pièce de rechange que vous venez de recevoir. Ceci veut dire que vous bénéficiez d'une amélioration de conception effectuée après la diffusion de ce catalogue.

IDENTIFICATION DES PIÈCES OU ENSEMBLES SELON LE NUMÉRO DE SÉRIE

Du fait des différentes modifications de conception effectuées pendant la durée de vie de cette machine, il est nécessaire de différencier les pièces d'origine des pièces reconçues d'après le numéro de série de la machine. Lorsqu'une pièce individuelle est reconçue, la référence de la pièce d'origine et celle de la pièce reconçue seront reliées par une parenthèse.

Lorsqu'un ensemble de pièces est reconçu, la configuration d'origine sera montrée dans l'illustration principale de la page et la nouvelle configuration sera indiquée comme un détail dans un cadre. Le détail encadré (insert) fera mention du numéro de série à partir duquel la modification est applicable. Lorsqu'une reconception importante a été effectuée, la page entière sera répétée et mention sera faite du numéro de série à partir duquel la modification est effective en haut de la page.

SYMBOLES INDIQUANT LE NUMÉRO DE SÉRIE À PARTIR DUQUEL INTERVIENT LA MODIFICATION

■ Un carré noir devant une référence de pièce indique que le stock existant devra être utilisé avant de commander la référence de remplacement qui est indiquée en-dessous.

La parenthèse est utilisée pour inclure deux ou plusieurs pièces ayant une application commune.

NOTA : Le remplacement ou l'interchangeabilité ne peuvent pas toujours être indiqués par un carré noir (■) ou une parenthèse (()) - Assurez-vous du numéro de série à partir duquel la modification intervient et où il y a substitution par une ou plusieurs pièces dans le catalogue de pièces.

Exemples pris dans un catalogue de pièces (avec ou sans Numéro de Série) :

742098 748867	Ceci indique que les deux pièces sont interchangeables.	
6278098 (N° de série 181-001 à 200) 7326972 (N° de série 181-201 et suivants)		Ceci indique une modification de conception dans laquelle les pièces ne sont pas interchangeables.
■ 730020 (N° de série 181-001 à 932) 840101 (N° de série 181-933 et suivants)		Ceci indique que la seconde pièce est interchangeable avec la première mais qu'elle doit être stockée pour son application respective.
■ 079323 (N° de série 181-001 à 600) 079498 (N° de série 181-001 à 680) 080032 (N° de série 181-681 et suivants)		Ceci indique que la seconde pièce est interchangeable avec la première mais qu'elle doit être stockée ainsi que la troisième pour leurs applications respectives.

IDENTIFICATION DU NUMÉRO DE SÉRIE

Afin de déterminer quelle pièce convient à votre machine, il est nécessaire d'en vérifier le numéro de série. Une plaque de série est fixée dans le coin avant gauche du châssis principal. Ce manuel s'applique aux machines portant le numéro de série 143.001.001 et suivants.
